Reporting

Ad Ops Performance  
Enhancement

# Explore Your Ads. Fast.

Our company is focused on providing instant Ad verification reports through our crawling technology that scans ad tags, sites and landing pages. Our partners can be confident that their users are protected from all possible ad quality threats whether they are served mobile or desktop ads.

The screenshot displays the AdsExplorer web application. On the left is a dark grey sidebar with the AdsExplorer logo and navigation links: Tasks (highlighted in orange), Campaigns, Billing, and Support. The main content area is titled 'Created Tasks' and includes a 'PROJECT' dropdown set to 'Unnamed' and a 'Username' field. Below this is a filter section with a funnel icon, the text 'Apply Filter', and a count of '38751 tasks found'. The central part of the interface is a table with the following columns: ID, Country, Connection, Time Added, Status, Triggers, and Actions. The table contains eight rows of task data, each with a 'View' button in the Actions column.

ID	Country	Connection	Time Added	Status	Triggers	Actions
85291172	US USA	Desktop, Windows 7, Chrome 60.0	2017-03-07 08:35:34	New		<a href="#">View</a>
85291172	DE Germany	Mobile, AndroidOS 5.1.1, Chrome	2017-03-06 12:28:01	New		<a href="#">View</a>
85291172	HK Hong Kong	Mobile, iOS 10.2, Safari	2017-03-07 08:35:34	Completed	JS Alert Audio	<a href="#">View</a>
85291172	GR USA	Desktop, Windows 7, Chrome 60.0	2017-03-07 08:35:34	Completed		<a href="#">View</a>

EMULATIONS

# Protect Your Users from Malware

- ✓ Aggressive Ads
- ✓ Identify Latency Issues
- ✓ Identify Broken Links
- ✓ Offensive Content & Landing Pages
- ✓ Immediate Alerts
- ✓ AD Verification
- ✓ Detailed Reports

# Premium IP's

At AdsExplorer, we get premium IP's: Residential and Carriers IP's.

This lets you check ads as it seen by a real user and get in depth reports of ad and site verifications.

**Over 90% suspicious content becomes undetectable through Hosted IP's.**

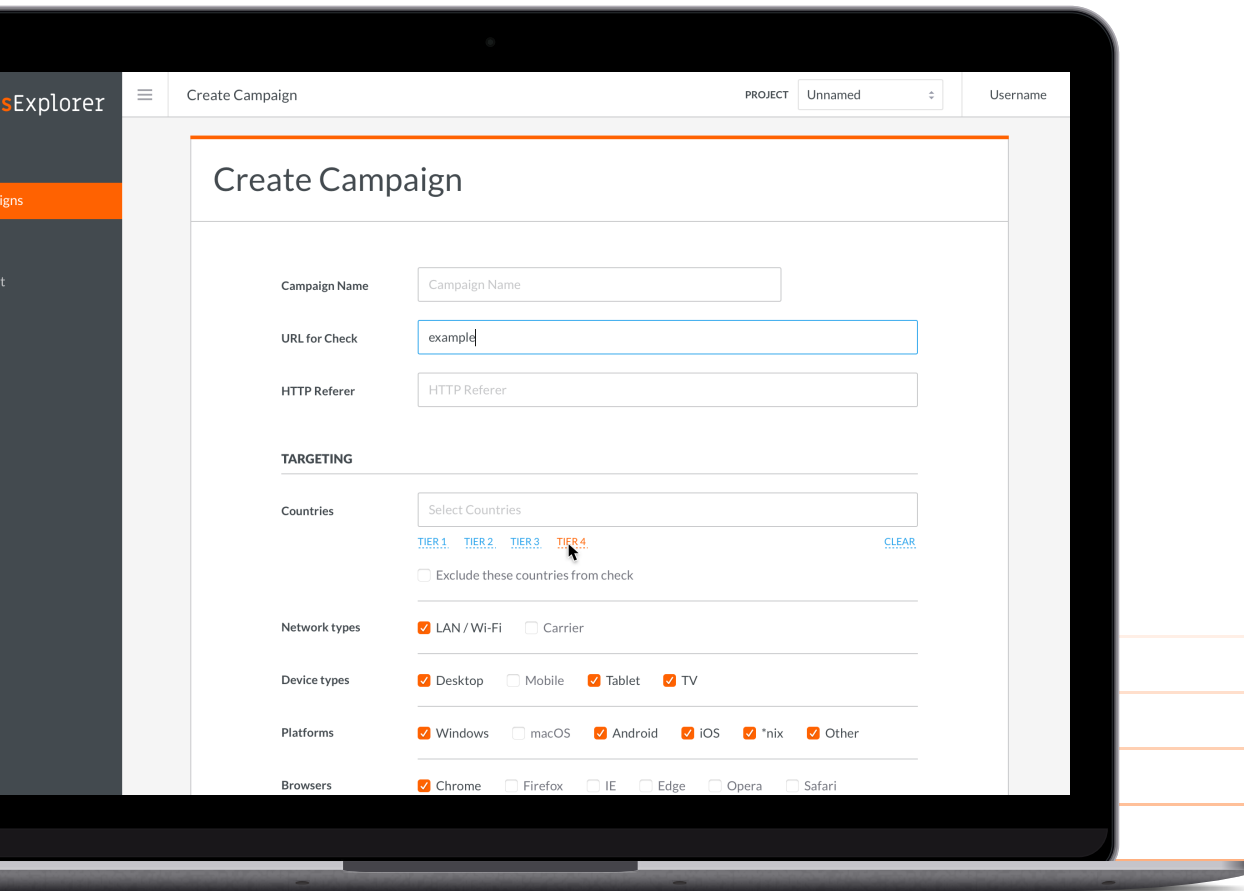

# Smart Scanner

AdsExplorer has more than 20 different operational tests that can be used to scan ad tags and landing pages in timely manner. You can also request to generate specific activity:

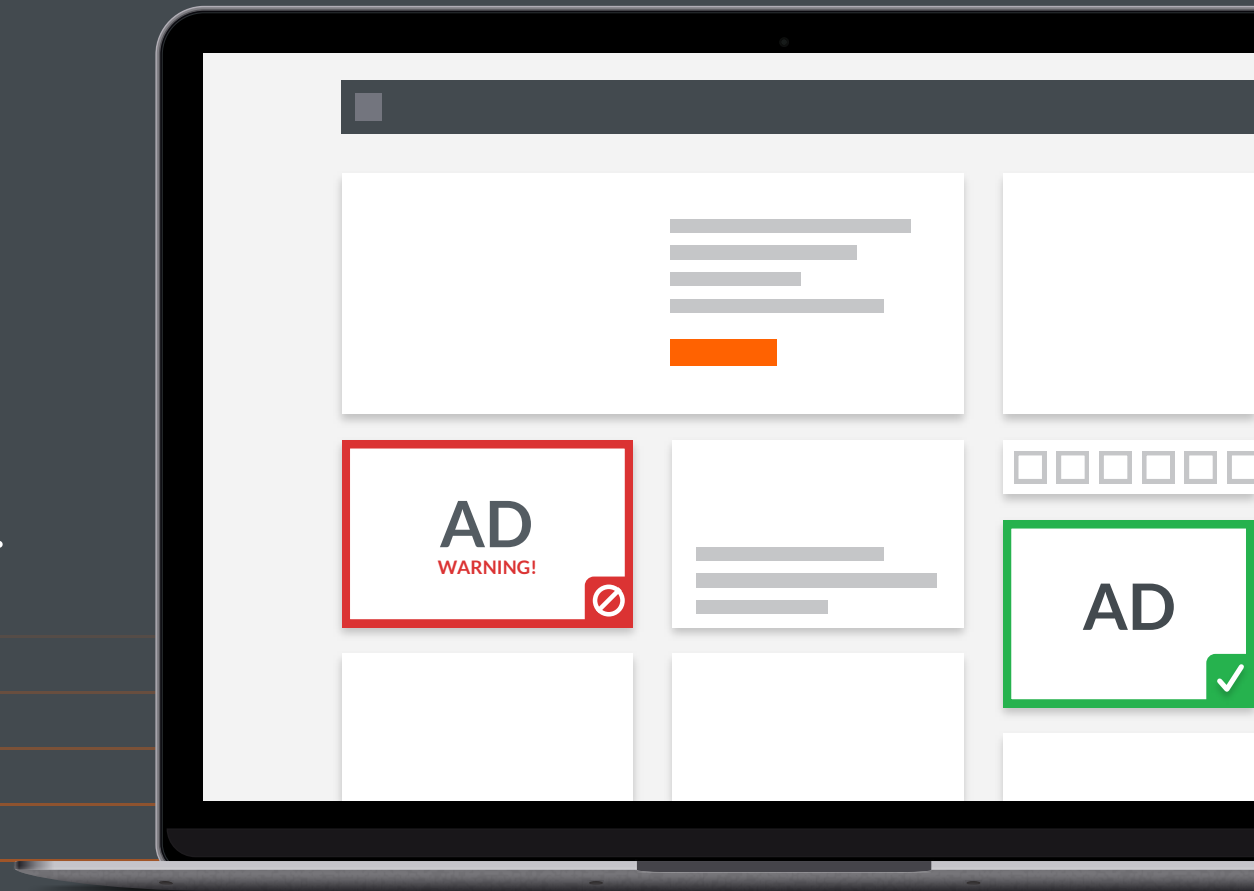

- Click through chosen banners,
- Enter info,
- Click through a special path
- and more.

# Audience Safeguard

Our solution will guard your desktop and mobile users from any kind of bad advertisement experience.

# Instant Full Reports

AdsExplorer generates special reports through intelligent threat analysis that consist of comprehensive information and listing that allow you to make full AD Verification on your traffic sources.

The screenshot shows the 'View Report' page for a 'Popunder task #83999577'. The interface includes a sidebar with navigation links: Tasks, Campaigns, Billing, and Support. The main content area displays task details: Project (AdsExplorer), Campaign (Fresh Market), Time added (2017-09-22 04:03:38), Status (Completed), Antivirus check for domains (Yes), URL (https://www.kayak.com/packages/punta-cana), HTTP Referer (https://www.kayak.com), and Click selector (Body). Below this, there are tabs for 'Load #1', 'Load #2', and 'Load #3'. The 'Last URL' is listed as https://www.kayak.com/cars/Hong-Kong/Hong-Kong-c23190/2018-01-15/2018-04-30. At the bottom, there are buttons for 'Click: JS Alert' and 'Audio'. A small thumbnail of the report content is visible at the bottom right.

The screenshot shows the 'View Report' page for a task, displaying a detailed report. The interface includes a sidebar with navigation links: Tasks, Campaigns, Billing, and Support. The main content area features a grid of images, likely representing ad spots or campaign elements, with a 'NEW EPISODES' label. Below the grid, there is a section titled 'Redirects' with a table listing URLs and triggers.

#	URL	Triggers
1	<a href="https://get.marshmallow.com">get.marshmallow.com</a>	JS Alert, Audio
2	<a href="https://jpl.happyhippie.com">jpl.happyhippie.com</a>	Audio
3	<a href="https://pl.suntrips.com">pl.suntrips.com</a>	

# Multi-Targeting

Our multi-targeting tool uses behavioral targeting techniques and checks from multiple browsers, devices, carriers, hosted and residential IP and locations.
